

Introducing MESA_query_driver and adriconf

Wednesday, 2 October 2019 16:35 (20)

For EVoC'18, I've done a project(have a look at proposal here) implementing MESA_query_driver EGL extension and using that in adriconf for retrieving driver details on Wayland systems and flatpak packaging for adriconf.

List of things for talk

1. Explain MESA_query_driver(look at specs here)
2. Introduce adriconf
3. Details about adriconf flatpak
4. Areas of development and contribution to adriconf

Rob Clark(former board member) and I have an idea of adding adriconf to mesa sub-projects and we are discussing on it.

Code of Conduct

Yes

GSoC, EVoC or Outreachy

Yes

Travel Sponsoring

Travel including air-tickets(India to Montreal) & public transport from Airport to Concordia University. (1075to1400)

[google flights screenshot][<https://drive.google.com/open?id=1xq9GOGQ9EPaUDt4oIZQOOFdtFYOHjg>]

I've called Chateau Versailles hotel for accommodation and confirmed that for people attending Concordia University will have a special discounted rate and will be around 750 *for the whole stay and food*.

The total estimate would be \$1850 - 2150
